# Announcement

**MTR2000 PMR Base Station**

28th July 2000

**Now available for Motorola  
Authorised Dealers Network**

The MTR2000 is mainly used in radio networks like Selectacom MX/ SmartNet/SmartZone and conventional infrastructures. The excellent RF data and the wide range of features make the MTR2000 the first choice in the analogue station market.

## Radio Packages

This station is now available to many of the EMEA dealer networks. In addition to the Eurobase (GR350/950) and BS770 this offering provides a high quality mid/high tier conventional station at competitive prices. To make ordering and deliveries as easy as possible a set of packages have been specified which are available from EDC stock.

The following offerings have been defined:

Model VHF 132-174MHz / 40Watt:     **MTR2000E40V132**

Model UHF 403-470MHz / 40Watt     **MTR2000E40U403**

Option Power Cable with UK Plug:     **PWR2000UK**

or Option Power Cable with Euro Plug     **PWR2000EU**

Note: only one Option per Model is possible.

- The Radio Package includes**
- Repeater Operation (without Duplexer)

**Launch Pack**

To allow a simplified market introduction the below listed launch packs have been defined. These packs can be ordered through OPG at reduced price.

- Model VHF 132-174MHz: **LAUNCHP\_VHF132**
- Model UHF 403-470MHz: **LAUNCHP\_UHF403**

- The launch pack consists of:**
- Radio Service Software RSS
  - Programming Cable ( to connect Lap Top and MTR2000)
  - Field Service Manual VHF or UHF

### **Goals / Strategy**

To generate incremental business and to capture a significant market share in the area of professional base stations.

- Competitive price
- Short delivery time, delivery from stock
- Easy to order: one model and one option number

### **Availability**

The packages are orderable NOW.

We kindly ask the regional organisations to contact the Product manager if you need further assistance
